

## Duraprints Scanning Slides & Negatives Price List. 31/5/2026.

We meet with our clients by appointment to ensure a senior technician is available to provide helpful advice. Consultations are free and without obligation.

Ph (07) 33991177 or send us an email to arrange an appointment or request more information on securing and sharing your photographic collection.

Prices for high-resolution scanning of 35mm slide and 35mm negative collections are based on quantities\*.

Digital files are supplied on a USB flash drive or a portable hard drive. DVDs are also available.

\*We have a minimum project fee of \$45 for up to 20 only 35mm slides or negatives plus the cost of a USB3 flash drive in a custom-printed presentation case.

### Prices for scanning of 35mm slide and 35mm negative collections.

Scan 21 to 50 - 35mm slides or negatives @ \$2.25 each.

Scan 51 to 100 - 35mm slides or negatives @ \$1.80 each.

Scan 101 to 300 - 35mm slides or negatives @ \$1.40 each.

Scan more than 301 - 35mm slides or negatives @ \$1.05 each.

35mm negatives can only be scanned as full strips or rolls. Above prices are per negative. For larger-sized negatives and transparencies, prices are available by quotation.

### Key benefits of our professional scanning systems.

Our scanning service incorporates skilled Photoshop technicians individually orientating and enhancing each scanned image with colour, exposure, and contrast adjustments at no extra cost. This process can significantly improve the results. Most suppliers charge extra for this scan enhancement stage.

35mm slides are scanned at 3200ppi. 35mm negatives are scanned at 2700ppi.

Digital Ice is also incorporated in our 35mm negative scanning process. While the use of Digital Ice does substantially extend the scanning time, this technology results in a significant reduction of dust and scratch marks that are evident on older negatives.

Our prices above include provision of both high and low-resolution .jpg digital images supplied in separate folders.

Slides and negatives are scanned and numbered in sequence as presented.

Packets and albums are numbered, and digital markers are provided to aid identification and assist in matching the original slides and negatives to the digital files.

USB3 flash drives are supplied in a presentation case with a custom-printed title of your choice.
